Study Title

Does Lipemia Cause Red Cell Hemolysis? (DOLCE)

Study Description

The study aims are:

1. To compare red cell recovery and haemolysis in components manufactured from lipaemic and non-lipaemic donations from multiple centres;
2. To determine whether the red cell additive solution influences haemolysis in the presence of lipaemia; and
3. To compare red cell haemolysis from lipaemic donations collected and stored in DEHP and non-DEHP containing blood packs.
